## EXPERIENCE

**Hybrid Robotics Lab (HRL)**, UC Berkeley 01/2020 - Present

R.A., Advisor: Koushil Sreenath & Sergey Levine Berkeley, CA

- Propose and implement the reinforcement learning-based controller for precise foot placement skills of bipedal robot Cassie, with foot placement information extracted from an on-board RGB camera.
- Propose and implement the approach for training bipedal robot in simulation to perform diverse and robust locomotion skills; Successfully transfer learned policy to the real robot.

**Partners for Advanced Transportation Technology (PATH)**, UC Berkeley 07/2019 - 02/2020

R.A., Advisor: Ching-Yao Chan Berkeley, CA

- Propose and develop the framework for optimizing lane change maneuver in highway environment with deep reinforcement learning. Proposed method performs favorably against baseline approaches.

**PKU Omni Smart Sensing Lab (POSS)**, Peking University 07/2018 - 12/2018

R.A., Advisor: Huijing Zhao Beijing, China

- Process data from RGB and Lidar inputs of autonomous vehicles in field environments. Implement traversable area segmentation using inverse reinforcement learning.
